Gitlab CI

This page is under construction.

**gitlab-ci.yml**

The **gitlab-ci.yml** file is responsible for defining how the CI pipeline runs. For details about the syntax of this file, see the Gitlab Wiki page.

**Terminology**

Job - A single section of CI executed on a runner.

Pipeline - A sequence of jobs in parallel or sequence. See the relevant Wiki page.

Runner - A machine that performs the actual execution of a job.
