

Hydrophones

Our hydrophones are a powerful tool for figuring out where we are in the water. Using 4 hydrophones, we can calculate our bearing to the pinger. For details, see [Pinger Bearing](#).

Testing Procedure

Materials:

```
1 tub of water
1 pinger
Hydrophone Test Rig
```

Test Rig:

1. Pinger at one end of tub
2. Hydrophones at other end of tub
3. If lots of noise in readings observed, can place towels around tub

Procedure:

1. ssh into the sub
2. roslaunch robosub cobalt.launch
3. rosrunc robosub pinger_bearing
4. rostopic echo /hydrophones/bearing
5. Manipulate hydrophones & Observe bearing readings
